

Configurations and Pressure ratings for 50mm (2") Cocky Valves.

PLEASE NOTE!

Our 50mm (2") valves are recommended for
Tank Installations ONLY.

If used in troughs, they should only be installed in extremely
low-pressure applications.

Please refer to our Data sheets for further information.

 300mm Arm (Float Above)	<i>Inlet below Water Line</i>	200mm (8") Float	250mm(10")Float	300mm(12")Float
	HP Pivot Point ONLY	30 PSI (207 kpa)	60 PSI (414kpa)	Not Recommended
 400mm Arm (Float Above)	<i>Inlet below Water Line</i>	200mm (8") Float	250mm(10")Float	300mm(12")Float
	HP Pivot Point ONLY	40 PSI (276kpa)	80 PSI (552kpa)	130PSI (896kpa)
 600mm Bent Arm (Float Above)	<i>Water Tank Install</i>	200mm (8") Float	250mm(10")Float	300mm(12")Float
	HP Pivot Point ONLY	Not Recommended	140 PSI (965kpa)	≥150PSI(1034kpa)

*Whatever flow you get to your trough, you will get into your trough after fitting our valves.
There is NO REDUCTION in the flow rate.*
